Tunisian Companies	301

This catalogue reflects the list of interested companies as of February 2013 only. The collection of company interests is on-going for Egypt, Tunisia and the Palestinian territory.

Preface

The EU-Turkey Global Business Bridges initiative is an EU-financed initiative launched by the EU Delegation to Turkey and the Turkish Ministry of Economy in cooperation with the Union of Chambers and Commodity Exchanges of Turkey (TOBB). The initiative consists of EU-Turkey business partnerships on the third markets based on existing and potential synergies, particularly in the neighbouring countries, around economic and industrial objectives. It is expected to consolidate the economic ties between EU-Turkish businesses and investors while contributing to the industrial development of the selected third countries and leaving a positive impact on their reforms on the business environment. The initiative is based on a research study on the pilot cases of Egypt, Tunisia and the selected sectors of the Palestinian economy carried out by TEPAV in cooperation with IEMeD. The Istanbul Bridge-Building Conference took place on 1 October 2012 as the launching event of the initiative with the participation of above 100 people. The Conference brought together authorities and business people from the EU, Turkey, Egypt, Tunisia and the Palestinian Authority for the presentation of the study and discussions on the next steps.

The initiative is now followed by matchmaking events bringing EU and Turkish businesses together in Turkey and target-oriented matchmakings in the selected third countries (Egypt and Tunisia) jointly by EU-Turkish business teams in 2013. The first matchmaking event took place in Turkey. The matchmaking event on transportation and logistics was held on 7-8 February 2013 in Mersin, while the matchmaking event in all the other sectors took place in Antalya on 21-22 February 2013.

This catalogue gives you all relevant information on participating companies who took part in these matchmakings and also showed interest in the target countries Egypt, Tunisia, Palestine Authority, and EU.

Participating Industries

The participating companies come from the following industries, and for the purpose of simplicity the following “Industry ID”s are used after company names in this catalogue to indicate the industries that the companies operate in :

Industry ID	Value Chains
1	Construction / Shopping Malls
2	Electro-Mechanical & ITC
3	Food & Beverages / Dairy / Aquaculture
4	Ready Made Garments
5	Plastics
6	Renewable Energy
7	Tourism
8	Transportation & Logistics
9	Legal Consulting Services
10	Management Consulting Services
11	Technical Consulting Services
12	Franchise and Trade

Companies from EU

1. BELLE SOCIETA COOPERATIVA

Industry : 1.
Contact Person : MASSIMILIANO CERBO - Export Area Manager
Address : Via Palmiro Togliatti 93, Imola, 40026, ITALY
Telephone / Fax : +39 0542 630 111 / +39 0542 630 211
E-Mail : m.cerbo@3elle.it
Web Page : www.3elle.it

Profile : Design, manufacturing and distribution of Interior wooden doors, wooden/aluminium/ PVC windows, safety doors.

Core Competencies : Experience in wood manufacturing, innovative design. customer oriented service.

Company Size : > 10 M. € & ≤50 M. € (according to turnover), ≥ 250 (according to the number of employees).

International Activities at Present :

Any Existing Partnerships in the Target Countries ? : No .

Targeting the Following Markets : Egypt;Palestine Territory;Tunisia;Turkey

Interested in : Trade.

Expectations from a Potential Partner :

Desired Business Contacts : Agent;Client;Dealer;Distributor;Representative;Strategic partner

Companies from EU

2. ABC S.N.C.

Industry : 3.
Contact Person : MOHAMED ALI ABCHA -
Address : San Marco, 2801, Venezia 30124, ITALY
Telephone / Fax : +39 (041) 527-4879 / +39 (041) 522-9948
E-Mail : restaurant@abeccafico.com
Web Page : www.abeccafico.com

Profile : Food service

Core Competencies : Food service

Company Size : ≤ 2 M. € (according to turnover), 10 - 49 (according to the number of employees).

International Activities at Present : none

Any Existing Partnerships in the Target Countries ? : No .

Targeting the Following Markets : Tunisia;Turkey

Interested in : Production. Organic farming and foundation of Italian-speaking Waldorf pre-schools.

Expectations from a Potential Partner : technological support, know-how, integration in international markets.

29. GEOS ENVIRONMENT S.R.L.

Industry	: 1;6;8;11.
Contact Person	: FLORINDO DE CRISTOFARO - Overseas Development Manager
Address	: Localita Fontaniello (Z.I.), Pastorano (CE), 81050, ITALY
Telephone / Fax	: +39 (0)82 387-2028 / +39 (0)82 388-3214
E-Mail	: info@geosgroup.it ; f.decrisofaro@geosgroup.it
Web Page	: www.geosgroup.it

Profile : GEOS is a truly European operator with excellent human capital, technological capabilities and business references; stating itself as a benchmark in this field due to the capacity to meet clients' needs and develop customized, open-ended solutions to the problems they encounter in the areas of waste management optimizing. Geos Environment has the resources and expertise to deal with all of the environmental concerns of Local Authorities and Industrial Companies offering a range of services designed to protect the environment and make our clients much more competitive and self-assured within their areas of influence. Among the leading National and European operators capable to provide a complete range of waste management services, Geos Environment covers the entire waste cycle, including urban cleaning services, soil and site remediation, collection, sorting, transfer, treatment and recycling -recovery. As priorities, we are committed to modelling and intensifying our integrated municipal and industrial waste management services lengthening our lead in waste treatment technology and continuing the industrialization of processes in order to recycle more and more resources. Geos Environment s.r.l. is therefore committed to the following goals: reducing the pollutant load of waste in order to mitigate the environmental impact of rising waste production; pushing forward with recycling and recovery as prerequisites of its future growth. As global regulations prioritize environmental protection the full value of its mission becomes clear. Quality Certification UNI-EN ISO 9001-2000, Environment Quality Certification UNI-EN ISO 14001, SOA Certification (category OG8 class II - category OS8 class II - category OG12 class V) - please see company brochure attached to this file

Core Competencies : Environmental Protection and Engineering Services, Waste Management (hazardous and non-hazardous waste sorting and treatment), Recycling, Waste Reduction Services and On-site Activities, Projecting and implementing integrated solutions leading to “zero waste” status, Regulatory and Obligations Compliance Assistance, Monitoring, evaluating and reducing financial exposure within the waste management processes, Declassification from hazardous to non hazardous (soil and water) waste, Energy Recovery/Power Generation/Conversion of waste into energy and/or raw materials, Soil Remediation and Decommissioning (ground, subsoil, underground and surface waters), Water treatment/Restraint of ground water contamination with on-site remediation plants (vacuum evaporating system, air-stripper, osmosis, high vacuum extraction, chemical oxidation, bio slurping-multi-phase extraction etc.), Pipe (and Tanks) systems maintenance and clearance, Landfill Construction and Management, Safety and Security Emergency Measures Interventions (MISE), Realization of Vertical Barrier Systems (diaphragm), Removal and disposal of materials containing ASBESTOS in every form (compact or powdery). Besides our core business fields we claim a consolidated expertise in the Logistic sector (through also our Turkish partner NIKMARINE) and we are also specialised (through our Division Company Athena Engineering S.r.l.) in realizing Sport Facilities and Multi-Purpose Fields using a wide set of advanced recycled materials like EOL Tyres Shock-Proof Rubber mixed with Acrylic/Polyurethane Resins (Soccer Fields, Athletic tracks, Tennis, Volley and Basketball courts, Skating rinks, Cycle tracks, Playground Areas etc. For Renewable Energy: Bio-gas salvage and treatment plants for energy saving scope by means of combustion and following it by electric energy production, through gas-turbine or internal combustion engines. Photovoltaic installation plants exploiting the energy radiated by the sun to produce electric energy using cells made of semiconducting material (e.g.: silica) Geothermal energy salvage plants exploiting geological heat resources by using electric energy generating turbines. Aeolian energy salvage plants converting winds kinetic energy in other energy forms (like electric, mechanical and so on) by using air-generators. For Transportation & Logistics: Besides our core business fields we claim a consolidated expertise in the Logistic sector (through also our Turkish partner NIKMARINE).

Company Size : > 2 M. € & ≤ 10 M. € (according to turnover), 10 - 49 (according to the number of employees).

International Activities at Present : None at the moment. Developments are in progress.

E-Mail : alessandra@specialcoffee.it
Web Page : www.specialcoffee.it

Profile : SpecialCoffee's passion for coffee is to "provide the pleasure of the Italian Espresso to the world by attracting drinkers with the quality of the aroma, the body and the crema of its coffee". SpecialCoffee started its coffee research, selection, importing, roasting and packaging in 1999 and its search for this quality has continued.

From its headquarters in Rogolo (SO) and with the core-business of Espresso "made in Italia", SpecialCoffee sells its Espresso at home and abroad to a variety of customers and through a mix of channels (Ho.Re.Ca., Large-scale Retail and Vending). The company has created a range of brands -SpecialCoffee, Caffé del Sole, EspressoCiao and Cafcao– to cover every coffee drinker's desire. We balance between tradition and innovation and provide products from beans to grounds to POD/capsules.

Passion for coffee is our driving force and SpecialCoffee wants to be known as a leading Espresso brand that consistently provides high quality in everything from the selection of best origins to the packaging, but at the same time provides excellent value for the money. With an eye on how best to mix the best of Italian elegance while searching for a better coffee, SpecialCoffee now delivers its product to more than 500,000 people, experiences, tastes and coffee cultures every day. Last but not least, SpecialCoffee can also offer the opportunity to make every kind of coffee blend under your own private label, thanks to its develop of co-packer's skills (even on international level). With all its knowhow, flexibility, dynamism and expertise, SpecialCoffee could be a right partner in each step of product realization (from selection of raw coffee quality until packaging).

Core Competencies : Italian style "espresso" roasting. Thus it means also know-how, skills and knowledge in research, selection,

importing of green coffee from origin countries before, as well as packaging then.

Telephone / Fax	: +49 7522 73-167 / +49 7522 73-710
E-Mail	: petra.zeller@diehl-controls.com
Web Page	: www.diehl.com/photovoltaics

Profile : Diehl Stiftung & Co. KG is a worldwide operating industrial group based in Nürnberg/Germany. A good 14,000 employees develop, manufacture and market Diehl products at over 80 locations in approx. 20 countries on four continents. The Diehl Group is divided into the corporate divisions Diehl Metall, Diehl Controls, Diehl Defence, Diehl Aerosystems and Diehl Metering, comprising forty subsidiaries and joint ventures. The company has been family-owned since its foundation in 1902.

Core Competencies : PLATINUM® products have been developed by Diehl Controls for high efficiency without compromises. Under the PLATINUM brand, which was founded in 2004, the company develops, manufactures and markets solar inverters in the output class 2 - 22 kW, intelligent devices for the monitoring of photovoltaic systems and user-friendly energy management solutions. With production volumes in excess of 20,000 electronics units per day in Germany alone, outstanding inverter technology that meets the highest requirements in terms of performance and output is being manufactured in the city of Wangen im Allgäu.

With a conversion efficiency of more than 98% and stable feeding even with very low irradiation, they are among the best of their type. They deliver impressively high quality, power ratings, reliability and extremely low failure rates. In short: PLATINUM® products are the ultimate in terms of solid and reliable plant components. This is reflected by the fact that many of our PLATINUM® products are shipped with a 10-year manufacturer's warranty, which can be optionally extended to 20 years. The production and test technologies used for manufacturing PLATINUM® inverters are second to none on the market. This is the secret of superior quality at marketable prices.

The PLATINUM® monitoring system offers a range of professional solutions for every size of plant. It enables around-the-clock monitoring of a photovoltaic plant and provides detailed data and measurements for function, power output and efficiency.

In the form of the innovative SmartHome concept, PLATINUM® offers a highly developed system for user-friendly energy management. This concept combines the elements of photovoltaics, storage and energy management with the aim of increasing self-sufficiency and cost-effectiveness in terms of electric power consumption.

Company Size : > 50 M. € (according to turnover), ≥ 250 (according to the number of employees).

Profile : TPAO has four core activities in the oil sector.

- Exploration, Drilling, Production and Well Completion

- Natural Gas Storage

- Participation to Oil and Natural Gas Pipeline Projects

- Oil Trade, Distribution and Transportation (TPIC, TPAO's Subsidiary).

Petroleum, natural gas, search, drilling, production, investment and distribution. Exploration, Drilling, Production, Crude Oil Marketing Natural Gas Marketing, Natural Gas Storage, National intermediate lines. As of the end of 2010, during exploration activities carried out in 16 Petroleum Exploration Zones in Marmara, Aegean, Black Sea, Central Anatolia, Eastern Anatolia, Mediterranean and Southeast Anatolia regions by TPAO geological teams, 27 25/30 man / month field geology work was done, and in total the geology of 5566 km² area was assessed. 2-D Seismic Activities (Km) in 2008 on Land: 1802, on Sea 11536, in year 2009 on Land: 816, on Sea 9747, in the year 2010 on Land: 936. 3-D Seismic Operations (Km²) in year 2008 on Land: 417790, on Sea 4040, in year 2010 on Land: 1315, on Sea 562 Drilling Activities.

Note: based on number of wells completed during the year. Domestic and International Oil and Natural Gas Production Year 2010 Production of Hydrocarbons (Oil Equivalent) Region / Country Project Name Type Barrels / Day, East Anatolia, South Eastern Anatolia Petroleum 34560, Thrace, Thrace-western Black Sea Natural Gas 4354. TOTAL DOMESTIC 38914. ACG Project in Azerbaijan Oil 19820, Shah Sea Project Condensate 2841, Natural Gas 8011, Kazakhstan KTM Natural Gas 2537, OVERSEAS TOTAL : 33029, THE OVERALL TOTAL :72123.

Core Competencies : To be an effective global company in the desirable region that meets petroleum and natural gas demand of Turkey. To identify the petroleum and natural gas potential of our country and contribute to the national economy. Provide income sources through international activities, to play an effective role in energy sector, to take an active role in turning our country to an energy corridor.

Company Size : > 50 M. € (according to turnover), ≥ 250 (according to the number of employees).

International Activities at Present : International activities have made TPAO an important actor in the region since the early 1990's. TPAO conducts its international activities especially in Caspian Region (Azerbaijan, Kazakhstan), North Africa (Libya) and Iraq. TPAO has been continuing to negotiate for business opportunities in other hydrocarbon rich regions such as South America, Russia and Middle East.

TPAO is currently a participant of two exploration, development and production projects which are Azeri-Chirag-Guneshli (6.75 %), Shah Deniz (9 %) in Azerbaijan. Most of the international production is from Azeri-Chirag-Guneshli Project located in offshore Azerbaijan. In addition to Azerbaijan projects, TPAO's production has been continuing from Kazakhstan fields. TPAO conducts its activities in Kazakhstan through a joint venture company, KazakhTurkMunai (KTM) Ltd. in which TPAO holds a 49% share and KazMunaiGas has 51%.

Within the scope of Libya exploration projects, a new oil discovery in the first exploration well drilled in license area 147/3-4 in Murzuq basin was realized in 2009, which was a significant step towards the first oil production in Libya. 7 out of 11 wells drilled in the basin were completed as "oil well". These discoveries rank among the first rows in the discoveries recently performed in Libya. On the other hand, since 1994, TPAO has been working closely with the Iraqi Ministry of Oil for exploration, development and production opportunities in Iraq. In addition to TPAO's success in first and second licensing rounds organized by the Iraqi petroleum authority PCLD (Petroleum Contracts and Licensing Directorate) in 2009 and awards of Badra and Missan Oil Fields development, TPAO has offered three bids for the Iraq's third licensing round and has been awarded for 20 year term gas development contracts for Siba Gas Field as a partner and Mansuriya Gas Field as an operator in Iraq's third bidding round in 2010.

TPAO has signed Development and Production Service Agreement for "Mansurai and Siba Gas Fields" in Iraq on June 5, 2011. Besides, TPIC, Subsidiary of TPAO, focused its exploration and drilling activities in the Gonzalez and Maria Conchita Blocks in Colombia.
